

Assignment-2 SDLC

Requirements Gathering Brief : Community Organizer Events App.

Interview Summary:-

A 30-minute ~~block~~ mock interview was conducted with a fictional stakeholder, Alex, a local community leader who frequently organizes events. The goal was to understand the needs, pain points & expectations for an app that simplifies event planning & participation within a community.

Key Functional Requirements :

1/ Event Creation & Management:

- Create events with title, description, date/time, location.
- Recurring event support.
- Edit & cancel events.

2/ User Registration & profiles

- Community members can sign up & create profiles.
- Join/leave events
- RSVP tracking.

3/ Notifications & Reminders

- Push/email reminders for upcoming events.
- Notifications ~~for~~ new/updated events

4/ Calendar Integration.

- Sync events with Google Calendar & iCal

5/ Community Groups & Roles

- Organize users into groups (e.g., Book Club, Sports Team).
- Admin role for event moderation & approval.

6/ Location Mapping.

- Integrate with Google Maps for directions to event locations.

7/ Feedback & Ratings:-

- Post-event feedback & ratings for organizers

Non-Functional Requirements:

- Mobile-first responsive design.
- Secure login with multi-factor authentication.
- Scalable backend to support multiple communities.
- Offline access to saved event details.

Documentation & Traceability:

- User Stories in a product backlog (e.g., "As a user, I want to RSVP to events so I can confirm attendance").
- Requirement Traceability Matrix (RTM) to map user stories to functional specs, test cases & design modules.
- Use Case Diagrams for key features (event creation, notification).
- Wireframes for user flows (event discovery, RSVP, feedback).
- Requirements stored in tools like Jira or Confluence for continuous tracking.
